EDUCATION

Harvard University Cambridge, MA
Ph.D., Applied Physics, School of Engineering and Applied Sciences May 2012
Thesis: Self-Organization of Bioinspired Fibrous Surfaces
Advisor: Prof. Joanna Aizenberg

Massachusetts Institute of Technology Cambridge, MA
S.M., Materials Science and Engineering 2004
Thesis: Evaporative Printing of Organic Materials & Metals and Development of Organic Memories
Advisor: Prof. Vladimir Bulović

Seoul National University Seoul, Korea
B.S., *summa cum laude*, Materials Science and Engineering 2000

PROFESSIONAL EXPERIENCE

Johns Hopkins University Baltimore, MD
Assistant Professor, Dept. of Mechanical Engineering/Hopkins Extreme Materials Institute January 2015-present

Air Force Research Laboratory Dayton, OH
Summer Faculty Fellow (Host: Drs. Philip Buskohl, Jeffery Baur) Summer 2020, 2021

Harvard University Cambridge, MA
Postdoctoral Fellow (Advisor: Prof. Katia Bertoldi) June 2012-December 2014

Harvard University Cambridge, MA
Doctoral Researcher (Advisor: Prof. Joanna Aizenberg) 2008-May 2012

EIC Laboratories, Inc. Norwood, MA
Staff Scientist (Supervisor: Dr. Krishna C. Mandal) 2004-2007

Massachusetts Institute of Technology Cambridge, MA
Graduate Research Assistant (Advisor: Prof. Vladimir Bulović) 2001-2004

AWARDS AND HONORS

Hanwha Non-Tenured Faculty Award 2022

Air Force Summer Faculty Fellowship 2021, 2020

Invitee, China-America Frontiers of Engineering, National Academy of Engineering 2019
- one of seven US engineers representing new materials area

Johns Hopkins University Whiting School of Engineering Research Lab Excellence Award 2019
- one in engineering school annually

FY 2018 Air Force Office of Scientific Research Young Investigator Program Award 2017

Invitee, Frontiers of Engineering, National Academy of Engineering 2016
- the total number of 100 engineers, generally 30-45 year olds, from industry, universities, and government labs attended to represent the full range of research in various engineering fields

NSF Fellowship for Summer Institute on Additive Manufacturing (Evanston, IL) 2013

Graduate Student Award Gold Medal, Materials Research Society 2011
- award to recognize students of exceptional ability who show promise for significant future achievement in materials research, one of six awardees in the world

MENTEE AWARDS AND HONORS

Beijun Shen (PhD student) 2022
American Physical Society Division of Soft Matter Travel Award
Gordon Research Conference on Multifunctional Materials Travel Award

Bohan Sun (PhD student) 2022
Gordon Research Conference on Multifunctional Materials Travel Award

Mostafa Omar (PhD student) 2022
Gordon Research Conference on Multifunctional Materials Travel Award

John Wu (undergraduate student) 2021
JHU Robert George Gerstmyer Award for outstanding achievement in mechanical engineering

Tessa Van Volkenburg (D.Eng. student) 2021
Materials Research Society Fall Meeting Best Poster Award
Winner of 2021 Hopkins Space Seed Grant as a PI
NASA Jet Propulsion Laboratory Europa In Situ Lander Conference Young Professional Travel Grant

Christopher Shallal (undergraduate student) 2021
National Science Foundation Graduate Research Fellowship
MIT Presidential Fellow
JHU Department of Biomedical Engineering Linda Trinh Memorial Award

Adebayo Eisape (PhD student) 2021
Microsoft PhD Fellowship

Mostafa Omar (PhD student) 2021
JHU Department of Mechanical Engineering Creel Family Teaching Assistant Award

Adebayo Eisape (PhD student) 2020
2nd Place Award in National Inventors Hall of Fame Collegiate Inventors Competition

Christopher Shallal (undergraduate student) 2020
Clinton Foundation Covid-19 Student Action Fund

Daniel Wang (undergraduate researcher) 2020
JHU Robert George Gerstmyer Award for outstanding achievement in mechanical engineering

Lichen Fang (PhD student) 2019
ASME Applied Mechanics Division Haythornthwaite Foundation Student Travel Award

Ozan Erol (Postdoctoral fellow) National Institute of Health NRSA F32 Post-Doctoral Fellowship (declined) Johns Hopkins University Whiting School of Engineering Research Trainee Award Finalist	2019
Rebecca Grusby (undergraduate researcher) Johns Hopkins University Provost's Undergraduate Research Award (PURA)	2018
Yishu Yan (M.S.E. student) ASME International Mechanical Engineering Congress and Exposition NSF Poster Competition Travel Award	2018
Khalid Elawad (undergraduate researcher) American Society of Cell Biology MAC Travel Award and 2 nd place poster award	2017

BOOK CHAPTER

(bold: graduate student or post-doc in my lab, *italics*: undergraduate in my lab, ^v: visiting student in my lab, *:corresponding author)

1. **A. Eisape, B. Sun, J. Li^v, S. H. Kang***, “Nanoporous composite sensors”, book chapter for **Nanoporous Carbons for Soft and Flexible Energy Devices**, Springer, 2022. <https://doi.org/10.1007/978-3-030-81827-2>

PATENTS (6 patents, 5 pending patents, and 6 invention disclosures)

“Slippery Surfaces with High Pressure Stability, Optical Transparency, and Self-Healing Characteristics,” J. Aizenberg, M. Aizenberg, S. H. Kang, P. Kim, T. S. Wong, U.S. Patent No. 9,121,306 (2015), 9,353,646 (2016), 9,932,482 (2018).

“Sanitization Systems and Components Thereof Having a Slippery Surface,” J. Aizenberg, M. Aizenberg, S. H. Kang, P. Kim, T. S. Wong, U.S. Patent No. 10,450,467 (2021).

“Anti-Counterfeiting Methods,” J. Aizenberg, T. S. Wong, S. H. Kang, X. He, U.S. Patent No. 9,937,743 (2018).

“Containers, Bottles, Drums, Vats, and Tanks Having a Slippery Surface,” J. Aizenberg, M. Aizenberg, S. H. Kang, P. Kim, T. S. Wong, U.S. Patent No. 10,233,334 (2019).

“Shape Recoverable and Reusable Energy Absorbing Structures, Systems and Methods for Manufacture Thereof,” S. H. Kang, K. Bertoldi, J. R. Raney, J. A. Lewis, S. Sicong, U.S. Provisional Patent Application No. PCT/US2015/27385, filed in April 2015.

“Anastomotic Coupling Device,” H. Xun, J. Sacks, C. Hicks, S. H. Kang, G. Brandacher, C. Shallal, U.S. Provisional Patent Application No. PCT/048317-593001WO, filed in July 2021.

“Flexible and Hybrid Energy Harvesting Device Combining Piezoelectric and Electrostatic Conversions,” A. Elsapé, U. Erturun, S. H. Kang, J. West, US Patent Application No. 17/059,735, filed in July 2021.

“Biomimetic Self-Adaptable Systems,” S. H. Kang, S. Orrego, US Patent Application No. 16/645,317, filed in February 2021.

“Fluoropolymer Shear-Thinning Inks and Methods of Making and Using Same,” D. Chatterjee, O. Erol, D. Gracias, N. Hibino, Z. Jiang, S. H. Kang, L. Romer, US Patent Application No. 17/604,648, filed in October 2021.

“Vent-Lock: A Safer Ventilator Splitter for Better Breathing,” S. H. Kang, H. Xun, J. Caffrey, B. Winters, J. K. Guest, A. Sapirstein, J. S. Unger, C. C. Shallal, M. Vladimirov, R. Tao, disclosed in April 2020.

“Drain-Lock: A Sutureless Device to Secure Surgical Drains,” S. H. Kang, J. Sacks, R. Tao, H. Xun, disclosed in November 2019.

“Uro-Lock: A Sutureless, Catheterless Urethrovesical Anastomosis for Radical Prostatectomy,” M. Allaf, S. H. Kang, J. Sacks, H. Xun, disclosed in November 2019.

“Shape-Changing Implants for Pediatrics,” S. H. Kang, D. H. Gracias, L. Romer, N. Hibino, G. O. Erol, disclosed in October 2018.

“3D Printing of Thermoplastic Silicone-Carbonate-Polyurethane Copolymer,” E. Bachtiar, S. H. Kang, disclosed in June 2018.

“Tunable Thin-Film Acoustic Sensor, Manufacturing Methods, and Processing Algorithms,” I. McLane, J. E. West, D. Emmanoulidou, M. Elhilali, V. Rennoll, U. Erturun, S. Orrego, S. H. Kang, disclosed in June 2017.

INVITED PRESENTATIONS

108. “Avian Bone-Inspired Lightweight Self-Adapting and Damage-Mitigating Materials,” The 6th “Multifunctional Materials for Defense” Workshop, Arlington, VA, December 2022.

107. “Bioinspired multifunctional materials with self-adaptable mechanical properties and mechanical metamaterials with adaptive energy absorption and extreme sound absorption,” Korea Institute of Machinery & Materials (KIMM), Daejeon, Korea, November 2022.

106. “Architected Liquid Crystal Elastomers with Synergistic Energy Absorption,” ENGE2022, Jeju, Korea, November 2022.

105. “Multifunctional Materials with Self-Adaptable Mechanical Properties and Damage-Mitigation and Architected Materials with Extreme Sound Absorption,” Department of Mechanical Engineering, North Carolina

State University, Raleigh, NC, October 2022.

104. “Multifunctional materials with self-adaptable mechanical properties & damage mitigation and architected materials with adaptive energy absorption,” Department of Mechanical and Aerospace Engineering, University of California, Los Angeles, CA, October 2022.

103. “Bone-inspired multifunctional materials with self-adaptable mechanical properties & damage mitigation and architected materials with adaptive energy absorption,” Department of Mechanical Engineering, University of California, Berkeley, CA, September 2022.

102. “Self-Adaptive Materials and Structures for Aerospace Applications,” Gordon Research Conference (Multifunctional Materials and Structures), Ventura, CA, September 2022.

101. “Multifunctional Materials with Self-Adaptable Mechanical Properties and Damage-Mitigation and Architected Materials with Extreme Sound Absorption,” School of Mechanical Engineering, Georgia Institute of Technology, Atlanta, GA, September 2022.

100. “Bioinspired multifunctional materials with self-adaptable mechanical properties and architected materials with adaptive energy absorption and extreme sound absorption,” Department of Mechanical Engineering, National University of Singapore, Singapore, July 2022.

99. “Bioinspired materials and devices for healthcare,” Stryker, Inc., Leesburgh, VA, July 2022.

98. “Synergistic energy absorption of liquid crystal elastomer meta-structures by coupling nonlinear deformation with viscoelastic properties,” Society for Industrial and Applied Mathematics, Pittsburgh, PA, July 2022.

97. “Bioinspired Composites with Self-Adaptable Mechanical Properties and Damage-Mitigation and Architected Liquid Crystal Elastomers with Synergistic Energy Absorption,” KIST Jeonbuk Institute of Advanced Composite Materials, Wanju-Gun, Korea, July 2022.

96. “Multifunctional materials with self-adaptable mechanical properties and damage mitigation and 3D printing of PTFE with tunable mechanical properties,” Chemical Division, Hanwha Solutions, Daejeon, Korea, July 2022.

95. “Multifunctional materials with self-adaptable mechanical properties, 3D printing of PTFE with tunable mechanical properties and architected materials with tunable, stretchable and conformal sound absorber,” Advanced Materials Division, Hanwha Solutions, Sejong, Korea, June 2022.

94. “Multifunctional Materials with Self-Adaptable Mechanical Properties and Damage-Mitigation and Architected Liquid Crystal Elastomers with Synergistic Energy Absorption,” Department of Polymer Science and Engineering, Pusan National University, Pusan, Korea, June 2022.

93. “Multifunctional Materials with Self-Adaptable Mechanical Properties and Damage-Mitigation,” Department of Mechanical Engineering, Korea Advanced Institute of Science and Technology, Daejeon, Korea, June 2022.

92. “Bone-Inspired Self-Adaptable Materials,” Department of Materials Science and Engineering, Seoul National University, Seoul, Korea, June 2022.

91. “Multifunctional Materials with Self-Adaptable Mechanical Properties and Damage-Mitigation and Architected Materials with Extreme Sound Absorption,” Department of Mechanical Engineering, Seoul National University, Seoul, Korea, June 2022.

90. “Bio-inspired materials with adaptive damage mitigation and architected materials with extreme energy absorption,” Korea Institute of Science and Technology, June 2022.

89. “Bone-inspired materials with self-adaptable mechanical properties & bio-inspired “growing” cardiovascular implants and sutureless anastomosis devices,” Department of Biomedical Engineering, Ulsan National Institute of Science and Technology, Ulsan, Korea, June 2022.
88. “Bio-inspired materials with self-adaptable mechanical properties and ^[1]_{SEP}architected materials with extreme energy absorption & deep subwavelength sound absorption,” School of Advanced Materials Science and Engineering, Sungkyunkwan University, June 2022.
87. “Multifunctional materials with self-adaptive mechanical properties and 3D printing of PTFE with tunable mechanical properties,” Hanwha Total Solutions (virtual), June 2022. **(2022 Hanwha Non-Tenured Faculty Award Presentation)**
86. “Bio-inspired multifunctional materials with self-adaptable mechanical properties & damage mitigation and architected materials with adaptive & extreme energy absorption,” Johns Hopkins Applied Physics Laboratory, Laurel, MD, June 2022.
85. “Bio-inspired composites with self-reinforcing mechanical properties & damage mitigation and architected materials with adaptive and extreme energy absorption,” NASA Goddard Space Flight Center Engineering Colloquium, Greenbelt, MD, May 2022.
84. “Bioinspired Multifunctional Materials with Self-Adaptable Mechanical Properties and Damage-Mitigation,” 2022 Spring Materials Research Society Meeting, Honolulu, HI, May 2022.
83. “Bone-inspired multifunctional materials with self-adaptable mechanical properties & damage mitigation and architected materials with adaptive energy absorption,” Department of Mechanical and Aerospace Engineering, University of Virginia, Charlottesville, VA, April 2022.
82. “Bioinspired materials with self-adaptable mechanical properties and damage mitigation and architected materials with adaptive energy absorption,” Department of Materials Science and Engineering, Technion – Israel Institute of Technology, Haifa, Israel, April 2022.
81. “Bio-inspired materials with self-adaptable mechanical properties & damage mitigation and architected materials with adaptive energy absorption,” School of Advanced Materials Science and Engineering, Sungkyunkwan University (virtual), March 2022.
80. “Bone-inspired multifunctional materials with self-adaptable mechanical properties & damage mitigation and architected materials with adaptive energy absorption,” Department of Mechanical Engineering, Northwestern University, Evanston, IL, February 2022.
79. “Shape-Changing Cardiovascular Devices to Accommodate Growth of Pediatric Patients,” The US-KOREA Conference on Science, Technology, and Entrepreneurship (UKC) 2021, December 2021.
78. “Bioinspired materials with self-adaptable mechanical properties and mechanical metamaterials with adaptive energy absorption,” Department of Mechanical Systems Engineering, Sookmyung Women’s University, Seoul, Korea, November 2021.
77. “Bioinspired materials with self-adaptable mechanical properties and damage mitigation and metamaterials with adaptive energy absorption,” Department of Advanced Materials Science and Engineering, Sungkyunkwan University, Suwon, Korea, November 2021.
76. “Bioinspired multifunctional materials with self-adaptable mechanical properties and metamaterials with adaptive energy absorption,” Department of Mechanical Engineering, Korea Advanced Institute of Science and Technology, Daejeon, Korea, November 2021.

75. “Self-adaptable materials: Bio-inspired multifunctional materials with self-adaptable mechanical properties and architected materials with adaptive energy absorption,” Department of Materials Science and Engineering, Korea Advanced Institute of Science and Technology, Daejeon, Korea, November 2021.
74. “Bioinspired materials with self-adaptable mechanical properties and damage mitigation and mechanical metamaterials with adaptive energy absorption,” Korea Institute of Science and Technology, Seoul, Korea, November 2021.
73. “Bioinspired multifunctional materials with self-adaptable mechanical properties and metamaterials with adaptive energy absorption,” Department of Mechanical Engineering, Seoul National University, Seoul, Korea, November 2021.
72. “Bioinspired materials with self-adaptive mechanical properties,” Department of Materials Science and Engineering, Seoul National University, Seoul, Korea, November 2021.
71. “Bioinspired multifunctional materials with self-adaptable mechanical properties and architected materials with adaptive energy absorption,” Department of Mechanical Engineering, Pohang University of Science and Technology, Pohang, November 2021.
70. “Self-adaptive materials, structures and devices,” Department of Mechanical Engineering, Johns Hopkins University, Baltimore, MD, September 2021.
69. “Bioinspired Synthesis of Multifunctional Materials with Self-Adaptable Mechanical Properties and Self-Regeneration,” ASC 36th Annual Technical Virtual Conference Tri-Agency AFOSR-ARO-ONR Symposium (virtual), September 2021.
68. “Self-adaptive materials, structures and programmable materials,” Air Force Research Laboratory, Dayton, OH, August 2021.
67. “Self-adaptive materials, structures and devices,” Department of Mechanical and Aerospace Engineering, Ohio State University, Columbus, OH, February 2021.
66. “Self-adaptive materials, structures and devices,” Department of Mechanical Engineering, Villanova University, Villanova, PA, November 2020.
65. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials & medical devices,” Department of Mechanical Engineering, University of Wisconsin, Madison, WI, October 2020.
64. “Self-adaptive materials, structures and devices,” Air Force Research Laboratory, Dayton, OH, July 2020.
63. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials & medical devices,” School of Mechanical Engineering, Georgia Institute of Technology, Atlanta, GA, February 2020.
62. “Bioinspired self-adaptable materials and “growing” cardiovascular implants,” College of Engineering, Michigan State University, East Lansing, MI, February 2020.
61. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Mechanical Engineering, Massachusetts Institute of Technology, Cambridge, MA, February 2020.
60. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Mechanical Engineering, University of South Carolina, Columbia, SC, February 2020.

59. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Mechanical Engineering, University of Utah, Salt Lake City, UT, November 2019.
58. “Bioinspired Multifunctional Materials and Devices with Self-Adaptability by Harnessing Mechanics,” ASME International Mechanical Engineering Congress and Exposition, Salt Lake City, UT, November 2019.
57. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Mechanical Engineering, McGill University, Montreal, Canada, October 2019.
56. “Harnessing fluid-structure interactions to utilize ambient wind energy for self-powered devices,” Biofuels - 2019, Toronto, Canada, October 2019.
55. “Self-adaptable material systems inspired by bone,” 56 Annual Technical Meeting of the Society of Engineering Science, St. Louis, MO, October 2019. (**Symposium keynote presentation**)
54. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” School of Mechanical Engineering, Purdue University, West Lafayette, IN, September 2019.
53. “Metamaterials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Physics, University of North Texas, Dallas, TX, September 2019.
52. “Bioinspired Synthesis of Multifunctional Materials with Self-Adaptable Mechanical Properties and Regeneration,” The 5th “Multifunctional Materials for Defense” Workshop, Arlington, VA, August 2019.
51. “Bioinspired Materials with Self-Adaptable Mechanical Properties and Regeneration Capability,” China-America Frontiers of Engineering Symposium, San Diego, CA, June 2019.
50. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Air Force Research Laboratory, Dayton, OH, April 2019.
49. “Bioinspired self-adaptable materials and architected materials with adaptive energy absorption,” Department of Materials Science and Engineering, University of California, Los Angeles, CA, April 2019.
48. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Mechanical and Civil Engineering, California Institute of Technology, Pasadena, CA, April 2019.
47. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” HRL Laboratories, Malibu, CA, April 2019.
46. “Architected materials with adaptive energy absorption and self-adaptable cardiovascular implants,” Department of Mechanical and Aerospace Engineering, University of California, Los Angeles, CA, April 2019.
45. “Architected materials with adaptive energy absorption and bioinspired self-adaptable materials,” Department of Mechanical and Aerospace Engineering, University of California, San Diego, CA, April 2019.
44. “Bioinspired self-adaptable materials and architected materials with adaptive energy absorption,” Department of Materials Science and Engineering, University of California, Irvine, CA, April 2019.
43. “Bioinspired self-adaptable implant devices and materials,” Johns Hopkins University Department of Medicine/Whiting School of Engineering Research Retreat, Baltimore, MD, March 2019 (**Award presentation**).

42. "Bioinspired self-adaptable materials and ultrasensitive low-cost nanoporous composites," Johns Hopkins Applied Physics Laboratory, Laurel, MD, January 2019.
41. "Bioinspired "growing" cardiovascular implant devices by 3D printing," The 12th IEEE Int. Conf. on Nano/Molecular Medicine and Engineering (IEEE-NANOMED 2018), Honolulu, HI, December 2018.
40. "Bioinspired self-adaptable materials and "growing" cardiovascular implant devices," Department of Mechanical and Materials Engineering, Duke University, Durham, NC, October 2018.
39. "Bioinspired self-adaptable materials and "growing" cardiovascular implant devices," Department Chemical and Biomolecular Engineering, North Carolina State University, Raleigh, NC, October 2018.
38. "Bioinspired materials that can sense and adapt to mechanical Loadings and damages," First International Conference on 4D Materials and Systems, The Electrochemical Society, Yonezawa, Japan, August 2018.
37. "Bioinspired self-adaptable materials and "growing" cardiovascular implant devices," Department of Mechanical Engineering, Seoul National University, Seoul, Korea, August 2018.
36. "Bioinspired self-adaptable materials and implant devices," Department of Materials Science and Engineering, Seoul National University, Seoul, Korea, August 2018.

FUNDING

[Current]

Air Force Office of Scientific Research (PI)

Aug. 2021-Aug. 2025

- *Avian Bone-Inspired Lightweight Self-Adapting and Damage-Mitigating Materials*. Total award: \$604,819 (\$604,819 for Sung Hoon Kang)

Hanwha Non-Tenured Faculty Award (PI)

July 2022-June 2023

- *Multifunctional materials with self-adaptable mechanical properties*. Total award: \$12,000 (\$12,000 for Sung Hoon Kang)

Johns Hopkins Catalyst Award (PI) Dec. 2020-Dec. 2022
- *Reprogrammable Architected Materials: Decoupling Form From Functions*. Total award: \$75,000 (\$75,000 for Sung Hoon Kang)

Air Force Office of Scientific Research (PI: Yun Chen, Co-PIs: Sung Hoon Kang, Ishan Barman, Stavros Gaitanaros) Feb. 2022-Jan. 2023
- *Acquisition of Atomic Force Microscope for Dynamic Topographical and Mechanical Characterization of Biomaterials*. Total award: \$123,975 (Defense University Research Instrumentation Program (DURIP))

[Completed]

Air Force Office of Scientific Research Young Investigator Program (PI) Jan. 2018-Jan. 2022
- *Bioinspired Synthesis of Multifunctional Materials with Self-Adaptable Mechanical Properties and Self-regeneration*. Total award: \$450,000 (\$450,000 for Sung Hoon Kang)

Bisciotti Foundation Translational Fund (PI, Co-PIs: J. Sacks, G. Brandacher, C. Hicks) Mar-May 2022
- *Vaso-Lock: Replacing Sutures for Faster, Easier and Safer Microvascular and Vascular Anastomosis*. Total award: \$50,000 (\$39,122 for Sung Hoon Kang)

Maryland Innovation Initiative (PI, Co-PIs: Justin Sacks, Gerald Brandacher, Caitlin Hicks) Jan-Dec 2021
- *Vaso-Lock: Replacing Sutures for Faster, Easier and Safer Microvascular and Vascular Anastomosis*. Total award: \$115,000 (\$82,820 for Sung Hoon Kang)

National Science Foundation DMREF Program (PI: Thao (Vicky) Nguyen, Co-PIs: Sung Hoon Kang, Kevin Hemker, Mark Robinson, Peter Olmsted) Sep. 2016-Dec. 2021
- *Predictive Multiscale Modeling of the Mechanical Properties of Polymers 3D Printed Using Fused Filament Fabrication*. Total award: \$1,754,990 (\$395,393 for Sung Hoon Kang)

Cohen Foundation Translational Engineering Grant (PI, Co-PIs: J. Sacks, G. Brandacher, C. Hicks) Mar. 2020-Jun. 2021
- *Vaso-Lock: A 3D Printed Coupling Device for Microvascular Anastomosis*. Total award: \$100,000 (\$42,506 for Sung Hoon Kang)

Johns Hopkins President's Initiative on Covid-19 Medical Supply Innovation (PI, Co-PIs: Julie Caffrey, Jamie Guest) Apr. 2020
- *A Bioinspired Ventilator Splitter*. Total award: \$25,000 (\$25,000 for Sung Hoon Kang)

National Institute of Health, R21/R33 Grant (PI: David Gracias, co PIs: Sung Hoon Kang, Lewis Romer, Narutoshi Hibino) Dec.2016-Nov. 2018
- *Self-Unfolding RV-PA 3D Printed Conduits*. Total award: \$237,231 (\$132,806 for Sung Hoon Kang)

Army Research Office (PI: Thao (Vicky) Nguyen, co PI: Sung Hoon Kang, Christopher Yakacki) May 2017-Apr. 2021
- *Extreme Dissipation Behavior of Main-Chain Liquid-Crystal Elastomers and Structures*. Total award: \$588,585 (\$49,099 for Sung Hoon Kang)

Office of Naval Research (PI: Zhiyong Xia, subcontractors: Sung Hoon Kang, James MacMahan) Aug. 2019-May 2021
- *Cost Effective Soft Sensors*. Total award; \$671,356 (\$100,000 for Sung Hoon Kang)

Johns Hopkins University Discovery Grant (PI: Rajat Mittal, co PIs: Sung Hoon Kang, Cynthia Moss, James West) Aug. 2019-Jun. 2021
- *Decoding the Biomechanics and Physics of Cetacean Biosonar*. Total award: \$100,000 (\$25,000 for Sung Hoon Kang)

Johns Hopkins Environment, Energy, Sustainability & Health Institute (PI: Rajat Mittal, co PIs: Sung Hoon Kang, Kouros Shoele) Jul. 2015-Jun. 2016
- *Harvesting Energy from Flow-Induced Flutter of 'Piezoleaves' for Self-Powered Sensors*. Total award: \$25,000 (\$12,500 for Sung Hoon Kang)

PROFESSIONAL SOCIETIES AND SERVICE

Editorial Board Member – Multifunctional Materials (Present), Sensors (Present), Scientific Reports (November 2014-October 2017)

Guest Editor – Special Issue on New Materials and Approaches in Materials Additive Manufacturing (2022), Special Issue on Soft Composite-Based Sensor of journal Sensors (2021), February 2016 issue of Materials Research Society Bulletin (“Beyond Conventional Lithography: Patterning via Self-Organization and Self-Folding”).

Member - American Society of Mechanical Engineers, Materials Research Society, Society of Engineering Science, American Physical Society.

Journal Reviewer – Nature, Science, Advanced Materials, Science Advances, Science Robotics, Additive Manufacturing, Advanced Functional Materials, Proceedings of the National Academy of Sciences, ACS Nano, Nanoscale, ACS Applied Materials & Interfaces, Applied Energy, Advanced Intelligent Systems, Chemical Engineering Journal, ACS Applied Energy Materials, Journal of the Mechanics and Physics of Solids, Extreme Mechanics Letters, Journal of Applied Mechanics, International Journal of Solids and Structures, Journal of Mechanics of Materials and Structures, Soft Matter, Composites Part A, Advanced Composite Materials, Matter, Smart Materials and Structures, Bioinspiration & Biomimetics, Advanced Materials Technologies, Advanced Engineering Materials, Regenerative Engineering and Translational Medicine, ACS Applied Polymer Materials, Materials and Design, Journal of Applied Polymer Science, 3D Printing and Additive Manufacturing, Journal of Mechanical Design, Langmuir, Applied Physics Letters, Materials Today Bio, Micromachines, MRS Advances, Research.

Proposal Reviewer - National Science Foundation, Army Research Office, American Chemical Society Petroleum Research Fund, Agency for Science, Technology and Research, Israel Ministry of Science & Technology, Dutch Research Council (NOW), Fonds de recherche du Québec.

University Ranking Survey Invitee – 2022, 2021, 2020, 2018, 2017 QS Global Academic Survey

Invited Workshop Attendee

Invitee, NSF Workshop on Architected Metamaterials for Civil Infrastructure May 2022

Invitee, Department of Energy, Advanced Research Projects Agency-Energy (ARPA-E) December 2019
- *Bioinspired Design Workshop*

Invitee, China-America Frontiers of Engineering Symposium June 2019
- *60 early-career engineers from Chinese and US universities, industry, and government are invited to facilitate international cooperation and understanding.*

Invitee, ARO Workshop on the Future of Vibration Energy Transfer in Solids and Structures October 2016

Invitee, National Academy of Engineering’s US Frontiers of Engineering Symposium September 2016
- *100 engineers, generally 30-45 years old from industry, universities, and government labs are invited to represent the full range of engineering fields.*

Invitee, NSF Workshop on Interdisciplinary Frontiers of Designing Engineering Material Systems July 2016

Professional Society Technical Committee Leadership - Chair (2020), Vice Chair (2019), Secretary (2018), Editor (2017), ASME Technical Committee on Mechanics of Soft Materials

Scientific Committee Membership – Member of the Polymer Scientific Committee for the National Institute of Standards and Technology (NIST) AM-Bench 2021: Additive Manufacturing Benchmark Test Series

Conference Track Co-Chair

Society of Engineering Science Annual Meeting – Track on Frontiers in Mechanics of Materials 2020

Conference Symposium Co-Organizer (33 symposia)

Materials Research Society Fall Meeting 2021

– Additive Manufacturing: From Material Design to Emerging Applications

American Physical Society March Meeting – Focus Session on Physics of Bioinspired Materials 2021

American Physical Society March Meeting – Focus Session on Mechanical Metamaterials 2020

Multiscale Materials Modeling – Multiscale Modeling of Polymers and Soft Materials 2020

Society of Engineering Science Annual Meeting – Mechanics and Physics of Soft Materials 2020

Society of Engineering Science Annual Meeting – 3D/4D Printed Materials 2020

ASME International Mechanical Engineering Congress & Exposition – Mechanics of Soft Materials 2020

ASME International Mechanical Engineering Congress & Exposition – 3D Printed Soft Materials 2020

ASME International Mechanical Engineering Congress & Exposition – Mechanical Metamaterials 2020

Materials Research Society Fall Meeting – Lessons from Nature: From Biology to Bioinspired Materials 2020

American Physical Society March Meeting – Focus Session on Mechanical Metamaterials 2019

American Physical Society March Meeting – Focus Session on Physics of Bioinspired Materials 2019

ASME International Mechanical Engineering Congress & Exposition – Mechanics of Soft Materials 2019

ASME International Mechanical Engineering Congress & Exposition – Mechanical Metamaterials 2019

ASME International Mechanical Engineering Congress & Exposition – 3D Printed Soft Materials 2019

Society of Engineering Science Annual Meeting – 3D/4D printed functional materials and structures 2019

Society of Engineering Science Annual Meeting – Mechanical Metamaterials 2019

Society of Engineering Science Annual Meeting – Mechanics and Physics of Soft Materials 2019

American Physical Society March Meeting – Focus Session on Mechanical Metamaterials 2018

American Physical Society March Meeting – Focus Session on Physics of Bioinspired Materials 2018

American Physical Society March Meeting 2018

- Invited Session on Lessons from Biological Soft Materials and Their Applications

ASME International Mechanical Engineering Congress & Exposition – Mechanics of Soft Materials 2018

ASME International Mechanical Engineering Congress & Exposition – Mechanical Metamaterials 2018

ASME International Mechanical Engineering Congress & Exposition – 3D Printed Soft Materials 2018

U.S. National Congress for Theoretical and Applied Mechanics 2018

- Mechanics and Physics of Soft Materials: Instability and Manufacturing of Soft Materials

U.S. National Congress for Theoretical and Applied Mechanics 2018

- Mechanics and Physics of Soft Materials: Soft Active Materials

American Physical Society March Meeting - Focus Session on Physics of Bioinspired Materials 2017

Society of Engineering Science Annual Meeting - Mechanics of 3D Printed Materials and Structures 2017

ASME International Mechanical Engineering Congress & Exposition – Mechanics of Soft Materials 2017

ASME International Mechanical Engineering Congress & Exposition – Mechanical Metamaterials 2017

American Physical Society March Meeting – Focus Session on Physics of Bioinspired Materials 2016

Society of Engineering Science Annual Meeting - Mechanics of 3D Printed Materials and Structures 2016

ASME International Mechanical Engineering Congress & Exposition - 3D Printed Soft Materials 2016

Conference Student Poster Competition Judge

Society of Engineering Science Annual Meeting 2017

External Thesis Committee Member

Mr. Yu-Ki Lee (Ph.D. candidate in Materials Science and Engineering at Seoul National University)	2021
Ms. Hadar Shaked (Ph.D. candidate in Materials Science and Engineering at Technion-Israel Institute of Technology)	2021
Ms. Hyeon Kim (M.S. candidate in Materials Science and Engineering at Sungkyunkwan University)	2021

SERVICE FOR UNIVERSITY, DEPARTMENT AND INSTITUTE

Johns Hopkins Dept. of Medicine-Whiting School of Engineering Retreat Award Committee	January 2021
Johns Hopkins University Commencement Marshal	May 2018
5th Annual Johns Hopkins Postdoctoral Retreat Oral Presentation Competition Judge	May 2018
Johns Hopkins Institute for NanoBioTechnology Annual Symposium Poster Competition Judge	May 2018
Faculty Mentoring Focus Group – Whiting School of Engineering	May 2015

Thesis Committee Member (19 times)

Mr. Ojaswi Agarwal (Ph.D. candidate in Materials Science and Engineering) “Investigating Polycarbonate Welds Made with Fused Filament Fabrication”	June 2022
Ms. Gayatri Jayant Pahapale (Ph.D. candidate in Chemical and Biomolecular Engineering) “Microfabricated biomimetic hydrogel platforms to investigate the role of physical cues on cell behavior”	March 2022
Ms. Arunima Banerjee (Ph.D. candidate in Mechanical Engineering)	October 2021
Mr. Xiaofan Zhang (Ph.D. candidate in Civil Engineering) “Parametrically homogenized continuum damage mechanics (PHCDM) models for unidirectional fiber-reinforced composites”	July 2021
Mr. Lichen Fang (Ph.D. candidate in Mechanical Engineering) “Characterization and Optimization of Geometrical Accuracy and Mechanical Properties of Specimens Prepared by Fused Filament Fabrication”	April 2020
Mr. Philip Dorsey (Ph.D. candidate in Chemical and Biomolecular Engineering) “Towards spatial computing and chemical information storage in soft materials using DNA programming”	January 2020
Mr. Wangqu Liu (MSE candidate in Chemical and Biomolecular Engineering) “3D printing of multi-functional hydrogels”	July 2019
Mr. Jiayu Liu (Ph.D. candidate in Mechanical Engineering) “Mechanics-based design of stimuli-responsive hydrogel structures and devices”	May 2019
Ms. Wenlu Wang (MSE candidate in Chemical and Biomolecular Engineering) “A digital maskless photolithographic patterning method for UV-photocleavable PEGDA hydrogels with a camphorquinone-triethanolamine photoinitiator”	May 2019
Mr. Philip Dorsey (Ph.D. candidate in Chemical and Biomolecular Engineering)	2018, 2019
Mr. Angelo Cangialosi (Ph.D. candidate in Chemical and Biomolecular Engineering) “DNA Programmable Soft Matter Devices”	May 2018
Mr. Zhiren Zhu (MSE candidate in Civil Engineering) “Computational Analysis of Piezoelectric Systems Using a Coupled Multiphysics Finite Element Model”	August 2017

Mr. Shu Guo (Ph.D. candidate in Civil Engineering) April 2017
“A Coupled Multi-physics Analysis Model for Integrating Transient Electro-Magnetics and Structural Dynamic Fields with Damage”

Mr. Xiaotong Fu (Ph.D. candidate in Chemical and Biomolecular Engineering) December 2016
“A New Platform For Microfluidic Sample Preparation Using On-Chip Electrokinetics”

Mr. Charles Dhong (Ph.D. candidate in Chemical and Biomolecular Engineering) October 2016
“Peeling Structured Surfaces in Viscous Environments: The Role of Deformation and Drainage Channels”

Mr. Longyu Zhao (Ph.D. candidate in Materials Science) February 2016-April 2016
“Design and Characterization of Fluidic and Thermal Properties of 3D Woven Lattice Materials for Heat Exchange Applications”

Ms. Barbara Murienne (Ph.D. candidate in Mechanical Engineering) January-March 2016
"Glycosaminoglycan Contribution to the Structure-Mechanical Properties of the Posterior Sclera"

Mr. ChangKyu Yoon (Ph.D. candidate in Materials Science) May 2015-December 2016
“Design, Characterization & Application of Stimuli Responsive Self-Folding Soft Microsystems”

Graduate Board Oral Examination Committee Member (16 times)

Mr. Chaojun Cheng (Ph.D. candidate in Mechanical Engineering) September 2020

Ms. Julia Carrol (Ph.D. candidate in Civil Engineering) February 2020

Ms. Sirui Bi (Ph.D. candidate in Civil Engineering) October 2019

Ms. Wei-Hung Jung (Ph.D. candidate in Mechanical Engineering) July 2019

Ms. Valerie Rennoll (Ph.D. candidate in Electrical and Computer Engineering) June 2019

Ms. Makeda Stephenson (Ph.D. candidate in Biomedical Engineering) May 2019

Mr. Mikhail Osanov (Ph.D. candidate in Civil Engineering) September 2018

Ms. May Thu Nwe Nwe (Ph.D. candidate in Civil Engineering) September 2018

Mr. Jiayu Liu (Ph.D. candidate in Mechanical Engineering) May 2018

Mr. Angelo Cangialosi (Ph.D. candidate in Chemical and Biomolecular Engineering) May 2018

Mr. Raleigh Linville (Ph.D. candidate in Biomedical Engineering) June 2017

Ms. Fatma Madouh (Ph.D. candidate in Mechanical Engineering) May, October 2017

Mr. Reza Yaghmaie (Ph.D. candidate in Civil Engineering) September 2016

Ms. Hahn Le (Ph.D. candidate in Electrical and Computer Engineering) August 2016

Mr. Longyu Zhao (Ph.D. candidate in Materials Science) April 2016

Mr. Gyeongwoo Cheon (Ph.D. candidate in Electrical and Computer Engineering) May 2015

Department Committee 2015-Present
ME Seminar Committee (Chair), Graduate Admission Committee (Member), Manufacturing Engineering ad hoc Committee (Member), Design Course ad hoc Committee (Member), Siebel Scholarship ad hoc Committee (Member)

Hopkins Extreme Materials Institute Committee 2015-Present
HEMI Seminar Committee (Chair), Academic Committee (Member)

STUDENT MENTORING AND ADVISING

Johns Hopkins University

Baltimore, MD

[Postdoctoral Fellow]

Dr. Seung-Yeol Jeon, Department of Mechanical Engineering October 2017-February 2020

- *Currently, Senior Scientist at Korea Institute of Science and Technology*

Dr. Galip Ozan Erol, Department of Mechanical Engineering June 2017-May 2019

- *Currently, New Product Development Technologist at W. L. Gore & Associates*

Dr. Santiago Orrego, Department of Mechanical Engineering May 2015-April 2018

- *Currently, Assistant Professor at Temple University*

[Doctoral Students] (total 8 students)

Students currently pursuing degrees

Mostafa Omar, Department of Mechanical Engineering (5th yr) Fall 2020-Present

- co-advised with Prof. Jaafar El-Awady (Dept. of Mechanical Engineering)

Adebayo Eisape, Department of Electrical and Computer Engineering (5th yr) Fall 2019-Present

- Microsoft PhD Fellow, co-advised with Prof. James West (Dept. of Electrical and Computer Engineering)

Bohan Sun, Department of Mechanical Engineering (4th yr) Fall 2019-Present

Grant Kitchen, Department of Materials Science and Engineering (4th yr) Spring 2022-Present

Beijun Shen, Department of Mechanical Engineering (4th yr) Fall 2019-Present

- co-advised with Prof. Vicky Nguyen (Dept. of Mechanical Engineering)

Tessa Van Volkenburg, Doctor of Engineering (3rd year) Summer 2020-Present

Shawn Usman, Doctor of Engineering (1st year) Summer 2021-Present

- co-advised with Prof. Colin Norman (Dept. of Physics and Astronomy)

Graduated students

Lichen Fang, Department of Mechanical Engineering Fall 2015-Summer 2020

- *Currently, Product Design Engineer at Apple*

[Master Students] (total 21 students)

Students currently pursuing degrees

Julia Xia, Department of Mechanical Engineering Fall 2021-Present

Madison Buck, Department of Mechanical Engineering Fall 2021-Present

Yawen (Evan) Liu, Department of Mechanical Engineering Fall 2021-Present

Yihe Wang, Department of Mechanical Engineering Summer 2020-Present

Aditya Bhide, Department of Mechanical Engineering Summer 2022

Graduated students

Fanzhen Ding, Department of Mechanical Engineering Fall 2020-Fall 2021

- *Currently, Research engineer at Allurion*

Zixuan Wang, Department of Biomedical Engineering	Fall 2020-Spring 2021
Runhan Tao, Department of Biomedical Engineering - <i>Currently, Research and development engineer at Shanghai MicroPort EP</i>	Spring 2019-Spring 2021
Shengyu Yao, Department of Mechanical Engineering - <i>Currently, Display mechanical engineer at Apple</i>	Fall 2018-Spring 2020
Zhezhi Chen, Department of Mechanical Engineering - <i>Currently, Reliability engineer at Apple</i>	Fall 2019-Spring 2020
Decheng Hu, Department of Mechanical Engineering - <i>Currently, PhD student at Lehigh University</i>	Fall 2017-Spring 2020
Shichen Xu, Department of Mechanical Engineering - <i>Currently, Design engineer at Access Point</i>	Fall 2017-Fall 2019
Boliang Wu, Department of Mechanical Engineering - <i>Currently, PhD student at University of California, Los Angeles</i>	Fall 2017-Spring 2019
Yishu Yan, Department of Mechanical Engineering - <i>Currently, PhD student at University of California, Berkeley</i>	Fall 2017-Spring 2019
Zeyu Zhu, Department of Mechanical Engineering - <i>Currently, Mechanical engineer at SANY America</i>	Fall 2017-Fall 2019
Junjie Pan, Department of Mechanical Engineering - <i>Currently, Mechanical engineer at Galen Robotics</i>	Fall 2017-Fall 2019
Emilio Bachtiar, Department of Mechanical Engineering - <i>Currently, PhD student at Duke University</i>	Fall 2016-Spring 2018
Azra Horowitz, Department of Biomedical Engineering - <i>Currently, Engineer at Cornell Medical Center</i>	Fall 2016-Spring 2018
Mohit Singhala, Center for Bioengineering Innovation and Design - <i>Currently, PhD student at Johns Hopkins University</i>	Fall 2016-Spring 2017
Shuyang Chen, Department of Mechanical Engineering - <i>Currently, PhD student at Rensselaer Polytechnic Institute</i>	January 2015-May 2016
Rui (Olivia) Wang, Department Materials Science and Engineering - <i>Currently, engineer at IBM</i>	Spring 2015-Summer 2015

[Undergraduate Students] (total 12 students)

Students currently pursuing degrees

Lujia Liu, Department of Mechanical Engineering	Fall 2021-Present
Sean Healy, Department of Biomedical Engineering	Spring 2021-Present
John Wu, Department of Mechanical Engineering	Summer 2021-Present
Mitchell Simmons, Department of Materials Science and Engineering	Fall 2021-Present

Graduated students

Jaeho Lee, Department of Mechanical Engineering - <i>Currently, PhD student at Georgia Institute of Technology</i>	Summer 2020-Spring 2022
Christopher Shallal, Department of Biomedical Engineering - <i>Currently, PhD student at Harvard-MIT Health Science and Technology Program</i>	Spring 2020-Summer 2021
Rebecca Grusby, Department of Chemical and Biomolecular Engineering - <i>Currently, Patent examiner at United States Patent and Trademark Office</i>	Spring 2018-Spring 2019
Daniel Wang, Department of Mechanical Engineering - <i>Currently, Product Design Engineer at Apple</i>	Spring 2018-Spring 2019
Urszula Krekora, Department of Chemical and Biomolecular Engineering - <i>Currently, Master student at Duke University</i>	Spring 2016-Spring 2019
Khalid Elawad, Department of Materials Science and Engineering - <i>Currently, Scientific Solutions Consultant at Synthace</i>	Fall 2016-Spring 2019
Eugene Kang, Department of Mechanical Engineering - <i>Currently, Mechanical engineer at Lockheed Martin</i>	Summer 2016-Spring 2017
Brett Caggiano, Department of Mechanical Engineering - <i>Currently, Technical Service Specialist, Abbott/St. Jude Medical</i>	June-August 2016
[Visiting Students] (total 19 students)	
Mose Park (PhD student from Sungkyunkwan University)	Spring 2020-Summer 2022
Hyo Eun Kim (Master student from Sungkyunkwan University)	Spring 2021
Gun Oh (PhD student from Sungkyunkwan University)	Spring 2020-Summer 2020
Woojun Jung (Master student from Sungkyunkwan University)	Spring 2020-Summer 2020
Jonlin Chen, MD student from Department of Plastic Surgery, Johns Hopkins School of Medicine - co-advised with Dr. Gerald Brandacher during Dean's Research Fellowship	2020-2021
Helen Xun, MD student from Department of Plastic Surgery, Johns Hopkins School of Medicine - co-advised with Dr. Justin Sacks during Dean's Research Fellowship	2019-2020
Zongyi Jiang (Undergraduate student from Shichuan University) - <i>Currently, Master student at Northeastern University</i>	July 2019-September 2019
O-Chang Kwon (PhD student from Korea University)	December 2018-March 2019
Somnath Sandeep (Undergraduate student from Birla Institute of Technology and Science) - <i>Currently, Co-Founder of Habbit</i>	July 2018-Jan. 2019
Binjie Li (Undergraduate student from Zhejiang University) - <i>Currently, Master student at Duke University</i>	July-September 2018
Shangdong Li (Undergraduate student from Maryland Institute College of Art) - <i>Currently, Facilities Technician/Design Associate at DiPole Materials</i>	May-August 2018
Jiaxin Xu (Undergraduate student from University of Nottingham, Ningbo, China)	July 2017-December 2017
Jing Li (PhD student from Wuhan University of Technology)	September 2015-August 2017

- *Currently, Assistant Professor at Hubei University of Technology*
- Shaoyang Qu (Undergraduate student from Tsinghua University) July 2017-September 2017
- *Currently, PhD student at Purdue University*
- Junjie Pan (Undergraduate student from Chongqing University^[1]) January 2017-May 2017
- *Currently, Hardware engineer at Hopkins AI*
- Peisheng He (Undergraduate student from Shanghai Jia Tong University) September 2016-January 2017
- *Currently, PhD student at University of California, Berkeley*
- Moses Kayondo (HEMI Extreme Science intern from Morgan State University) June-August 2015, 2016
- Tila Assgari (HEMI Extreme Arts intern from Maryland Institute College of Art) June-August 2016
- *Currently, Co-Founder of Citadel Skateboarding Foundation*
- Zeyu Zhu (Undergraduate student from Shanghai Jia Tong University) July-September 2016
- *Currently, Mechanical engineer at SANY America*
- Amanda Metcalf (HEMI Extreme Arts intern from Maryland Institute College of Art) June-August 2015
- *Currently, Project manager at Mirror NYC*

[High School Students] (total 2 students)

- Arthur Zhu (Princeton Day School) Jan 2020-Present
- *Currently, Undergraduate student at University of Pennsylvania*
- Elaine Nagahara (Poolesville Magnet High School) June-August 2019
- *Currently, Undergraduate student at Johns Hopkins University*

TEACHING

Johns Hopkins University

Baltimore, MD

EN. 530.352 Materials Selection (redeveloped course)

- Semesters taught: Fall 2021, Fall, 2018, Fall 2017

- Course description: An introduction to the properties and applications of a wide variety of materials: metals, polymers, ceramics, and composites. Considerations include availability and cost, formability, rigidity, strength, and toughness. This course is designed to facilitate sensible materials choices and associated processes to have desired performance and to avoid catastrophic failures leading to the loss of life and property.

EN. 530.618 Fabricatology – Advanced Materials Processing (new course)

- Semesters taught: Spring 2015 - 2022

- Course description: The “Fabricatology” is a course that students can learn how to make desired shapes, structures, and surfaces across various length scales. It will introduce rich scientific and engineering knowledge related to fabrication at multiple length scales and the generated materials and mechanical systems can be utilized for studying diverse topics including energy harvesting, metamaterials, wetting, and information storage. From this course, students can learn principles and technologies to control shapes at various length scales and processes to control internal structures or surface properties for desired properties/functions. They will be also introduced to exciting recent developments in the field such as 3D printing so that they can have a comprehensive knowledge about the subject.

EN 530.436 Bioinspired Science and Technology (new course)

- Semesters taught: Fall 2022, Fall 2020, Fall 2019, Fall 2016

- Course description: Nature has been a source of inspiration for scientists and engineers and it receives particular attention recently to address many challenges the human society encounter. This course will study novel natural materials/structures with unique properties, the underlying principles, and the recent development of the bioinspired materials and systems. From this course, students can learn about ingenious and sustainable strategies of organisms, open eyes about various phenomena in nature, and get inspiration for opening new directions of science and technology.

OUTREACH

Johns Hopkins University

Baltimore, MD

Special Lecture at Explore Engineering Innovation Program

July 2022

- Gave a lecture on bioinspired engineering for high school students

Host for the visit of students and teachers from Joint Science and Technology Institute July 2018, August 2017

- Gave lectures, lab tours, and demos for middle and high school students, teachers and staffs from a DoD STEM Summer program

Invited speaker at the Center for Education Outreach

June 2017, July 2016

- Gave lectures on 3D printing for high school students

Host for the visit of students and parents participating Summer program at Center for Talented Youth July 2017

Museum of Science, Boston

Boston, MA

Volunteer for Nano Days

April 2013, March 2011 & 2010

- Conducted interactive hands-on demonstration of nanoscience for general public of various age groups.
